PROJECTS

1. Myntra Home Page Clone (HTML/CSS/Bootstrap):

Description: This project involves cloning the Myntra home page using HTML, CSS, and Bootstrap.

Features: The clone is fully responsive, ensuring optimal display across various devices and screen sizes.

Live Link: <https://sasi-myntra-clone.netlify.app>

2. Random Quotes Generator (JavaScript DOM Manipulation):

Description: This project utilizes JavaScript DOM manipulation to fetch quotes from an API and dynamically display them on a webpage

Features: Users can click a button to generate and display random quotes fetched from the API.

Live Link: <https://sasi-task5-dom.netlify.app>

3. Country Explorer with API Integration (React.js):

Description: This project is a country explorer built using React.js and integrated with an external API to fetch country-related data

Features: It allows users to search for specific countries, view details such as population, capital, languages, and more.

Live Link: <https://country-api-fetch1210.netlify.app>
